ABOUT ME

I am motivated and detail-oriented Data Analyst with a strong foundation in data analysis, statistics, and programming. Equipped with a passion for transforming raw data into actionable insights, I thrive on solving complex problems through analytical thinking and data-driven approaches. My expertise includes data cleaning, and visualization supported by proficiency in tools like Python, SQL, and Excel.

PROJECTS

SALES DATA ANALYSIS & REPORTING | ATIL Q (GUIDED PROJECT)

- Analyzed company sales data using Excel, identifying key trends, top-performing products, and revenue patterns.
- Created interactive dashboards and visualizations to present insights, improving data-driven decision-making.
- Generated a comprehensive report with actionable recommendations to optimize sales strategies.

MARKET TRENDS & CUSTOMER SEGMENTATION ANALYSIS | ATIL Q (GUIDED PROJECT)

- Processed and analyzed large datasets using SQL to extract customer demographics and purchasing behavior.
- Developed dynamic Power BI dashboards to visualize market trends and segment customer groups.
- Provided insights on high-value customer segments, aiding targeted marketing efforts.
